**BW OFFSHORE** is a leading provider of floating production services to the oil and gas industry. The company also participates in developing proven offshore hydrocarbon reservoirs. BW Offshore is represented in all major oil and gas regions world-wide with a fleet of 15 owned FPSOs. The company has more than 30 years of production track record, having executed 40 FPSO and FSO projects. BW Offshore is listed on the Oslo Stock Exchange.

### PERFORMANCE

With an average uptime routinely at 99% over the past five years, BW Offshore exceeds client expectations but recognises internally that uptime must never be the priority over safe operations. Every day, our units are producing more than 600,000 barrels of oil equivalents.

### OPERATIONAL INTEGRITY - SAFETY FIRST

BW Offshore is fully committed to safety, occupational health, quality management and environmentally responsible performance. The company has implemented effective management systems and routines with a focus on continuous improvement in all its activities.

BW Offshore takes part in a value chain providing safe and affordable energy supply, an important factor for economic growth in both developed and undeveloped economies.

The company has an established framework for handling risk factors to ensure it operates in a safe and effective manner by adherence to the zero-harm policy and by minimising unnecessary use of resources and minimising the environmental impact of its operations.

Guided by its vision, purpose and principles, BW Offshore aspires to achieve sustainable development by striking a fair balance between financial results, value creation, sustainability and corporate responsibility.
